

RS ALASKA

Alaska is an indicator of the quality for the German working gloves.
A winter glove that protects against the chilly weather.
Made of cow split leather.

KÄLTE

reinforced with natural cowhide split leather and high-quality fabric
greater durability of the glove

the back of the glove tightened with an elastic band
holds the glove in the right place position

Ins-Tech System
reliable protection in chilly working environments

trimmed with leather thumb
provides full protection for your hand and extends the life of the gloves due to the protection of the most vulnerable places on the glove

a rubberized hardened cuff additionally protects the forearm
