

RS COMFO TEC WINTER

Insulated assembly, reinforced split goat leather (grain, selecting) glove. The dressing combines ergonomics at work with hand protection even in difficult conditions.

reinforced split goat leather (grain, selecting) glove
its inner layer is soft and outer layer is smooth and durable

gloves' sizing allow you to choose the ideal size for your hand in order to carry out both as a general assembly work, and work that requires high precision

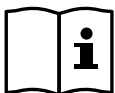

Ins-Tech system material with high thermal insulation parameters

trimmed with leather thumb provides full protection for your hand and extends the life of the gloves due to the protection of the most vulnerable places on the glove

the glove has a ribbed wrist keeps it in a proper position on the wrist
