

RS SUPER HEAVY

Super Heavy glove is the highest quality standard for split gloves, because only a certain thickness split leather from the back part of the hide is used for its production.

cow split leather work glove strengthening the glove - only certain thickness split leather from the back part of the hide is used for its production

Cotton Comfort and natural materials allows the skin to breathe freely

the elasticsation on the upper side of the glove keeps the glove in a proper position on the wrist

the strong threads and triple seams extend the life of the glove
