

# RS POLAR II

Fully covered with an improved quality foamed PVC. It is designed for working in the cold environments.

KÄLTE

**PVC - high quality**  
It allows you to immerse the hand.

**Sanitized Actifresh**  
preventing the growth of fungi and bacteria in the glove

**Ins-Tech system**  
high coefficient of thermal insulation

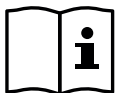

**PVC has a foam structure**  
it does not become solid even at very low temperatures that makes working safe and comfortable in the most difficult conditions

**soft ribbed wrist**  
keeps it in a proper position on the wrist and doesn't affect blood circulation in your hand

**RS POLAR II**
